

Door Awnings – Finding the Perfect Size

- A. Measure the width where you will mount the hinges on each side of the door trim or wall.
- Awning must be 8" wider than door opening to allow the door to open outward.

- B. Locate the mounting point where you will mount the top of the awning.

- Minimum mounting height above door opening for awnings 71" wide and under is **13 ½"** to allow the door to open outward.
- Minimum mounting height above door opening for awnings 72" wide and over is **16 ½"** to allow for center frame supports and to allow the door to open outward.
- From the top mounting point 12" down is where the arm of the awning will be located.
- The 7" valance will hang below the frame.

- Door awnings are not retractable.
- Custom Widths up to 240".

Frames for Door Awnings 71" Wide and Under

Frames for Door Awnings 72" - 95" Wide

Frames for Door Awnings Over 96" Wide

$$\text{Height} = \text{Drop } 12'' + \text{Valance } 7'' = 19'' \text{ Total Height}$$
