

◆ **Clear Vinyl**

We are proud of our clear vinyl. Used for tent and structural canvas enclosures, our clear (PVC) vinyl is mildew resistant and UV resistant. However, what makes our clear vinyl different from others on the market is that our clear vinyl has high dimensional stability and is flame retardant (CFSM, NFPA 701), as well as cold crack resistant up to -30°F.

Clear (PVC) Vinyl: 20 ga. & 30ga.

Low Shrinkage / High Dimensional Stability (ASTM Standard D1204: 0.1% shrinkage)
Flame Retardant Certified (CFSM, NFPA 701)
Cold Crack Resistant up to -30°F
Mildew Resistant
UV Resistant
Grade A PVC Resin
High Tensile & Tear Strength
Certified Wind Loads +70MPH (for all drop curtains)

- 20 GA – Super Clear
- 30 GA – Super Clear
