

# SUNSETTER LATERAL ARM MODELS

*Selecting the perfect size.*

Fits Motorized and Manual Awnings.

A- Measure frame width. (Should be an even foot measurement)

B- Measure Projection to determine Sunsetter Model.

- Lateral Arm Models has a 7', 9', & 10'2" projection depending on width of awning.
- XL Lateral Arm Model will have a 11' 8" Projection or 13' 1" Projection.
- A motorized or manual awning will not affect the size of your fabric.

Use the charts on the web-page to double check your frame and fabric size.
