

♦ Clear Vinyl

We are proud of our clear vinyl. Used for tent and structural canvas enclosures, our clear (PVC) vinyl is mildew resistant and UV resistant. However, what makes our clear vinyl different from others on the market is that our clear vinyl has high dimensional stability and is flame retardant (CFSM, NFPA 701), as well as cold crack resistant up to -30°F.

Clear (PVC) Vinyl: *20 ga. & 30ga.*

Low Shrinkage / High Dimensional Stability (ASTM Standard D1204: 0.1% shrinkage)
Flame Retardant Certified (CFSM, NFPA 701)
Cold Crack Resistant up to -30°F
Mildew Resistant
UV Resistant
Grade A PVC Resin
High Tensile & Tear Strength
Wind Loads 70MPH with no damage- Applies using our bottom tie-downs and side fastening system

• 20 GA – Super Clear
• 30 GA – Super Clear

Cold Crack Resistant up to -30° F

ASTM Standard D1204: 0.1% shrinkage

UV Resistant

High Tensile & Tear Strength

Independently Tested Wind Loads 70mph with No Damage
