

Square vs. Round

5½ft Square = 7½ft Octagon

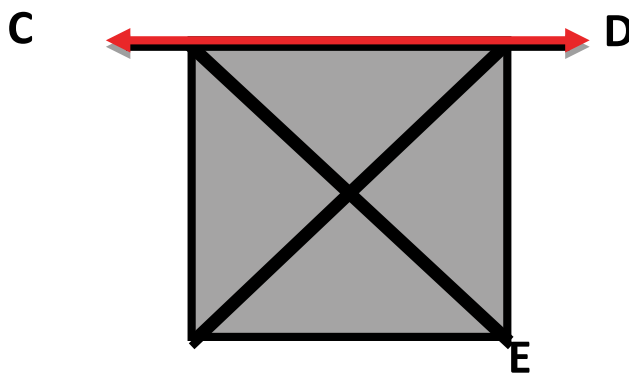

6½ft Square = 9ft Octagon

7½ft Square = 11ft Octagon

How to measure a SQUARE umbrella

A SQUARE (4 rib) umbrella is measured from point C to point D along the edge of the panel.

EXAMPLE: A 5½ft SQUARE (4 rib) would measure approximately 5½ft from point C to point D along the edge of the panel, making it a 5½ft umbrella, but measures 7½ft from point C to point E along the ribs.
