Retractable Awning Replacement Fabric Calculator

**Enter measurements in inches.
Use decimals for fractions.**

Fabric Width: Measure the existing fabric width (typically about 5" less than the frame width).

Projection: Measure from the roller tube to the front bar then, ADD 12" for Roller Tube

Valance Height: Select 6", 7", or 8" (personal preference).

All replacement covers are **shipped ready to install** and include a matching valance with a 1/4" insert (spline) sewn into the fabric for installation into the existing tracks.
